The TInnGO project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement no 824349

The TInnGO Multistakeholders' Forum is taking place on 22nd October 2020, being the digital fora where new perspectives to approach gender smart mobility in the transport sector will be discussed with different stakeholders.

Key concepts in TInnGO project, such as smart mobility, gender and diversity mainstreaming will be introduced. A view of gender in smart transport connects the TInnGO roadmap, on how this can progress current debates and create a paradigm shift towards greater inclusivity in the transport sector.

Scientific evidence will be presented and discussed on how inequalities are created and furthermore, the Forum will address paradigm shifts in education, employment, technological innovations and entrepreneurship as arenas for change and inclusion. It will present which strategies/policies and interventions have been most successful in increasing diversity, and where more could be done, and whether this is having any effects in the wider transport system.

During TInnGO Multistakeholders' Forum, intersectional approaches to understand Mobility will be the focus of stakeholders, considering the TInnGO observatory and 10 national hubs in 13 European countries. Intersectionality in relation to COVID19 revealed questions on differences in every day life also related to mobility options or the lack of them.

The way forward opening a policy window for Gender Smart Mobility in the provision of proximity between stakeholders at both regional and European levels and to contribute with new knowledge in the design and implementation of sustainable future strategies of transport and future European policies.
