DEADLINE:
15 Nov.

The TInnGO project Final digital Conference, “**Creating a paradigm shift towards gender and equality in smart mobility**”, will take place from **17th – 19th November 2021**, in conjunction with the **10th International Symposium on Travel Demand Management** and the final conference of **DIAMOND** project.

The transport policy's vision is that everyone should have the equal access to transport services, to be able to go where they want or need to go and to be able to do so easily, safely, confidently and without extra cost. Transport could

make a difference in promoting gender and diversity equality. Transport is a traditionally male-dominated sector, both from an employment perspective and the values it symbolises. A successful strategy needs transparency, ambition and setting practical actions across all industry sectors and users. With this in mind, coherent and innovative efforts have been made to provide transport professionals with the data, tools and approaches to assist them to plan and achieve gender and diversity equality in transport and to incorporate gender issues in their planning and implementation.

Whilst gender in transport is therefore a rather new professional field, currently there is a huge amount of research, design and planning of systems required in order to achieve gender equality in the many sectors. For example, the HORIZON 2020 call, MG-4-3-2018 on demographic change and participation of women in transport funded the DIAMOND and TInnGO project to create gender and diversity sensitive data methodologies and tools to achieve gender equality in transport.

The event will be an opportunity to develop and drive forward synergy between academics, researchers, policy makers and industry.

Join us on 17th - 19th November 2021!
